### PROFESSIONAL EXPERIENCE

**Edgewrapper Technologies Pvt. Ltd.**  
**Frontend Developer**

**Dec 2020 - Present**

---

### PROJECTS

#### **eCommerce and social App And Seller App** **Flutter, Firebase, NodeJS & MongoDB**

Designed and implemented a comprehensive e-commerce platform, which includes secure user sign-in options, efficient product management, and the convenience of signing in with Google, Apple and Facebook accounts. I've also integrated social sharing features to enhance user engagement.

#### **Accounting App** **Flutter, NodeJS & MongoDB**

Proficient in designing and developing an accounting app that empowers users to efficiently manage their financial transactions, including sales and purchase journal entries. Implemented a streamlined system for adding products to the app using QR codes, enhancing user convenience and accuracy.

#### **NFT marketplace app** **React-Native, Firebase & Opencnft API**

Experienced app developer with a focus on NFT apps. I've created a user-friendly NFT platform where users can connect their Cardano wallets, explore NFTs, create their own, and manage collections. Our app also lets you buy and sell NFTs securely. We use blockchain tech for safety and transparency.

#### **Fitness Website** **NextJS, Strapi, EventBriteAPI, TailwindCSS**

Developed a comprehensive fitness website featuring information about the fitness company, powered by data sourced from Strapi for dynamic content management. Additionally, the platform facilitates seamless event registration through EventBrite, providing users with easy access to fitness events. Users can also book venues conveniently through PeerSpace. My integration with EventBrite ensures up-to-date event data, enhancing the user experience and engagement.

## PROJECTS

### Expense Manager App

Flutter

Designed and developed an app that allows users to effortlessly add their income and expenses, providing a clear financial overview. The app features an expense filter for convenient transaction categorisation and a comprehensive list of financial activities. Users can visualize their financial data through interactive charts, organised by date, enabling better financial planning and tracking. Additionally, I've incorporated profile creation functionality to enhance the user experience, enabling personalised financial management.

### TimeSheet Plugin

WordPress, PHP, jQuery

created a user-friendly plugin that allows WordPress administrators to effortlessly add employees, clients, managers, and projects as WordPress users. Managers can efficiently manage their teams by adding employees, while employees can easily record their daily work hours for specific projects and clients, ensuring precise time tracking. The plugin simplifies employee time management, providing admin users with comprehensive reports listing all employees and their work hours for different projects and clients. These reports are easily filterable by time, project, and client, making data-driven decision-making a breeze and promoting effective project management.

### Seller Website

ReactJS, Chalice & PostgreSQL

Developed a seller website using ReactJS for the frontend, AWS Chalice for the API, and PostgreSQL for the database. I've successfully designed and developed a user-friendly platform that empowers clients to manage their product categories in a flexible hierarchy, ensuring effective organization. Clients can seamlessly add vendors, manage customer relationships, create user profiles, define user groups, and manage access permissions for their teams, providing a comprehensive solution for business operations.

### Custom Wordpress Page design & Issue fixing

WordPress, JQuery, PHP, Elementor, ACF

Experienced WordPress developer with a strong track record of enhancing and optimising WordPress websites. I've successfully tackled and resolved various plugin issues, ensuring seamless functionality. Additionally, I've skilfully set up and configured Advanced Custom Fields (ACF) to enable flexible content management. As part of custom solutions, I've created tailored WordPress plugins to meet specific client requirements. My proficiency also extends to setting up websites using the Elementor page builder, allowing for easy and visually appealing web design. Furthermore, I've demonstrated my problem-solving abilities by identifying and rectifying PHP errors in websites, enhancing overall site performance and stability.
