-

WORK EXPERIENCE

Edgewrapper Technologies Pvt. Ltd.

Dec 2020 - Feb 2025

Director

Led mobile app development with Flutter and Dart, developed web apps using ReactJS and NextJS, and created custom WordPress themes and plugins.

PROJECTS

eCommerce and social App And Seller App

- **Technologies:** Flutter, Firebase, NodeJS & MongoDB
- **Details:** Developed an e-commerce platform with secure sign-in options, efficient product management, and integrated social sharing features to boost user engagement.

Accounting App

- **Technologies:** Flutter, NodeJS & MongoDB
- **Details:** Skilled in developing an accounting app for managing financial transactions, including sales and purchase journals, with a streamlined QR code system for easy product addition.

NFT marketplace app

- **Technologies:** React-Native, Firebase & Opencnft API
- **Details:** Experienced in developing NFT apps, creating a user-friendly platform for Cardano wallet integration, NFT exploration, creation, and secure buying/selling with blockchain technology for transparency.

Expense Manager App

- **Technologies:** Flutter
- **Details:** Developed an app for tracking income and expenses with a clear financial overview, expense filter, interactive charts, and profile creation for personalized financial management.

PROJECTS

SMS App

- **Technologies:** Flutter, Kotlin
- **Details:** Developed an SMS app using Flutter and Kotlin with auto-reply functionality, allowing users to automatically respond to incoming messages with customizable replies, enhancing communication efficiency.

GYM App

- **Technologies:** Flutter, Firebase
- **Details:** Developed a gym management app enabling users to handle subscriptions and attendance efficiently.

Fitness Website

- **Technologies:** NextJS, Strapi, EventBriteAPI, TailwindCSS
- **Details:** Developed a fitness website with dynamic content from Strapi, seamless event registration via EventBrite, and venue booking through PeerSpace for enhanced user experience and engagement.

Seller Website

- **Technologies:** ReactJS, Chalice & PostgreSQL
- **Details:** Developed a seller website with ReactJS, AWS Chalice, and PostgreSQL, enabling clients to manage product categories, vendors, customer relationships, user profiles, and team permissions for streamlined business operations.

TimeSheet Plugin

- **Technologies:** WordPress, PHP, JQuery
- **Details:** Created a WordPress plugin for managing employees, clients, and projects, allowing admins to add users, track work hours, and generate filterable reports for efficient project and time management.

Custom WordPress Page design & Issue fixing

- **Technologies:** WordPress, JQuery, PHP, Elementor, ACF
- **Details:** Experienced WordPress developer skilled in optimizing websites, resolving plugin issues, configuring ACF/SCF for flexible content management, creating custom plugins, and using Elementor for visually appealing designs. Proficient in troubleshooting PHP errors to improve site performance and stability.
